Web Design Sun

To Whom It May Concern:

I am Yuri Yurchenko, a CTO at Web Design Sun. I would like to write a letter of recommendation for Alexander Lysak, who was a part of my team for more than 4 years.

I would like to recommend Alexander Lysak for the position of Middle FullStack Developer. During his time in the company, Alexander proved himself as a hardworking and dedicated team member with a strong understanding of his work.

He is loyal, responsible, and ready to work extra hours when necessary. Alexander has experience with a wide tech stack, including Python (Django and Flask), PHP (CodeIgniter and Laravel), JavaScript (Vue 3, React), Docker, and PostgreSQL. He joined our team as a Laravel developer and expanded his knowledge into Python and modern JavaScript frameworks.

When facing technical problems, Alexander stays calm and focused, showing a good attitude towards solving challenges. He is not afraid to take on new and diverse tasks. He also gained valuable experience working in a team.

There were no conflicts during our time working together. He is a corporate-minded person who adjusts to the company's needs. His technical competence and willingness to learn make him a valuable developer.

If you need more information, please do not hesitate to contact me at yuri.yurchenko@iig.global.

Sincerely,
Yuri Yurchenko, Web Design Sun, CTO
